

## EVIDENCE & VIDEO STORAGE NETWORK: CLASS II

Multiple Access Point Users/ Single Administrator  
Class II systems starting at less than **\$6,000.00**  
Larger and Smaller scale configurations are available

WIRELESS or ETHERNET NOTEBOOKS

Some data management solutions require machines that can handle a higher volume of production data, as well as retain the capability to keep it efficiently organized and secure.

At I.T.S., we are here to ask the right questions in order to help you make the best decision for your specific data storage needs. If your agency has 3-25 and even upward to 40 DVM's in active duty, then a solution to maximize your management of the daily data produced would require a much more substantial system. The Class II hosts Multiple Users w/ controlled access interface at any Desktop or Laptop with an assigned task to utilize the Video Management Software. The Class II is designed for an expanding Local Area Network; several computers/laptops accessing the one main server storage tower with its dedicated backup/archiving system. It can start in a conservative platform of 3TB to 6TB of storage and is expandable to 8TB in some tower configurations. If you prefer rack mounted machines at this level, this can be utilized as well. The Class II can deliver.
