When data management is an ever growing and expanding task that services volumes of integrated data, as well as requiring the capability to efficiently organizing and securing digital evidence, then there is no better option than the Class III Configuration.

At I.T.S., we are here to help you make the best decision for your specific data storage needs. If your agency has several precincts with upwards of 50+ DVM's in active duty each, then a solution to manage you volume of the daily data produced would require an integrated and sustainable Wide Area solution. The Class III hosts Multiple Users at multiple locations w/ controlled access interface at any Desktop or Laptop with an assigned task to utilize the Video Management Software. The Class III is designed for the expanding Wide Area Network; several locations with computers/laptops accessing the one server storage location with its dedicated backup/archiving system. This system can initiate from one full rack server and back up system to an array of server s dedicated to your evidence management needs
